

Al crear dos párrafos con el mismo ID en CodePen el resultado es el siguiente:

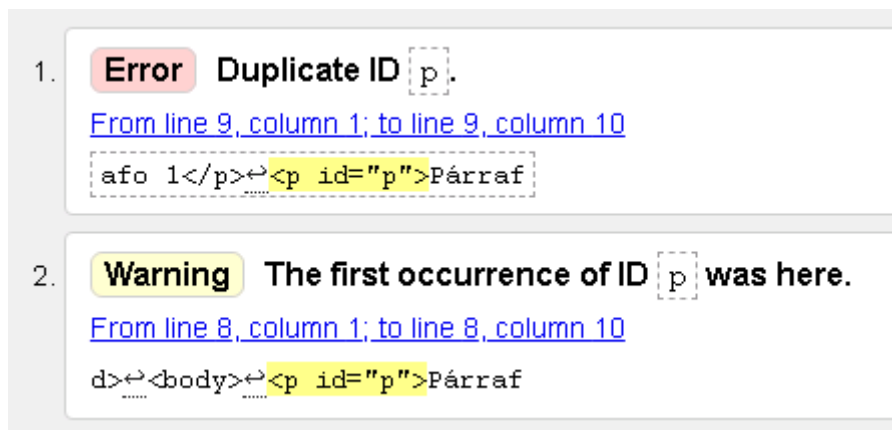

The screenshot shows a CodePen editor window with the title "HTML" and a status bar indicating "20 unsaved changes". The code editor contains two lines of HTML code:

```
1 <p id="p">Párrafo 1</p>
2 <p id="p">Párrafo 2</p>
```

Párrafo 1

Párrafo 2

Al validarlo en W3C da el siguiente error:

The screenshot shows two validation errors from the W3C validator:

- Error Duplicate ID** `p`.
[From line 9, column 1; to line 9, column 10](#)
`afo 1</p><p id="p">Párraf`
- Warning** The first occurrence of ID `p` was here.
[From line 8, column 1; to line 8, column 10](#)
`d><body><p id="p">Párraf`
